

The Group of 78 Bookshelf

Short reviews of books recommended by our members relevant to the themes of the Group of 78 mandate.

Alanna Mitchell, “Sea Sick: The Global Ocean in Crisis”

Emblem McClelland & Stewart. 2010.

Recommended by Shirley Farlinger July 17, 2011

“Read this book and you will recognize the urgent crisis we face and the need to bring our powerful technologies and insatiable demands under control” (David Suzuki). I can only agree that this is an education we all need. “The ocean contains the switch of life, not land, not the atmosphere, the ocean. And that switch can be turned off.”

Alanna Mitchell has done a superb job of examining the ocean and linking that to our climate change work.
